Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 9-12, drawn to apparatus for continuously producing a siding panel, classified in class 29.

II. Claim 13, drawn to apparatus of a series of elongated siding panels, classified in class 52, and subclass 518.

The inventions II and I are related as apparatus and product made. The inventions are distinct if either of the following can be shown:

(1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the product claims could be made by hand tools.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

A telephone call was made to request an oral election on 11/10/2004, but did not result in an election being made.
